COMPUTYPE ®
where tracking meets success

Identify & track your critical assets.

We are a family-owned company that leverages our expertise to identify and track critical assets with innovative programs that improve our customers' processes, performance, and control. We pride ourselves on being able to solve identification problems that others can't.

PRE-PRINTED BARCODES
Vision system verified with sequence tracking to ensure no duplicates and high read rates designed with your workflow in mind.

LABWARE PREP™ SERVICES
Your labware, procured, custom-marked, prepared and packaged to your specifications.

COMPLETE, ON-DEMAND LABEL PRINTING SYSTEMS
Printer evaluation and system setup to your specific materials, bar code verification, and functionality.

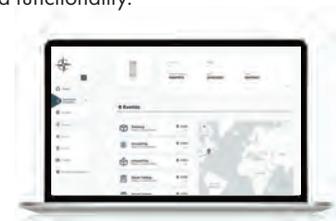

AUTOMATION
Automated and semi-automated label printing and application to labware and components that enhances workflow, throughput speed, and label placement accuracy.

RFID
Our team can help determine if RFID can deliver better results and ROI than bar codes for your application, and tailor to a complete system to your specific needs and environment.

LABTRACK™
Software tools that range from label format generation, design, management, barcode verification, and system integration to a cloud-based identification and tracking platform.

At our core...

For nearly 50 years, Computype has been dedicated to providing comprehensive tracking and identification solutions to various industries, including life sciences. Over the years we've grown familar with the unique rigors of laboratory and sample storage environments, as well as the crticial nature of the safety of your specimens and accuracy of work. From blank labels, barcodes, and printers, to automation, digital traceability, and fully prepared labware – we're prepared to complete your tracking and identification strategy where-ever it stands today.

Stop losing, start tracking your:

SAMPLES **INVENTORY** **FREEZER SPACE** **SHIPMENTS**

LabTrack™ provides an infrastructure that allows laboratories and scientific research facilities to track critical samples and specimens digitally and physically – monitoring their environment, location, storage, usage, and more via RFID and barcode identification. Our LabTrack™ system is a full-service, end-to-end traceability solution that can integrate into existing systems. With this data collection, you can produce powerful intelligence and predictive analytics to inform decision-making and promote efficiency and growth.

SIMPLIFY WORKFLOW COMPLEXITY **ADDRESS** LACK OF VISIBILITY **REDUCE** RISK OF LOSS

Spend time on science, not on labware prep.

PROCUREMENT **BAR CODE MARKING & RFID** **SEQUENCE MANAGEMENT** **SORTING & PACKAGING**

Labware Prep™ Services allow you to receive your labware already labeled, tared, sorted, and kitted to your specifications. With this service, you can experience significant time, budget, staffing, and inventory savings. Our flexible labware service program is the preferred choice for organizations focused on pharmaceutical development, biotechnology, clinical studies, and repository storage.

ADDITIONAL SERVICE OPTIONS:

- Custom marking & branding
- Data integration
- Tare weighing
- Nase controlled preparation
- Kitting
- Filling & capping
- Automated inventory management
